

ILLUMINATION EFFECTS AND APPLICATIONS

For those who appreciate the difference...

1

TREE ACCENT LIGHTING

Fixtures are positioned to illuminate trees from the ground up to highlight the structure, character, and color of the trees & to tell the landscape story after dark.

2 FACADE LIGHTING

Fixtures are placed to wash directly upward onto the facade to highlight and accent key architectural features, interesting textures or stonework resulting in dramatic and striking shadows.

3 MOON LIGHTING

Moon lighting is a hallmark of dramatic lighting design. Cool-colored rays filter down through a tree's canopy to create a unique, dappled pattern on the landscape below. Its soft effect mimics that of the moon, granting just enough light to enjoy the landscape from inside or out.

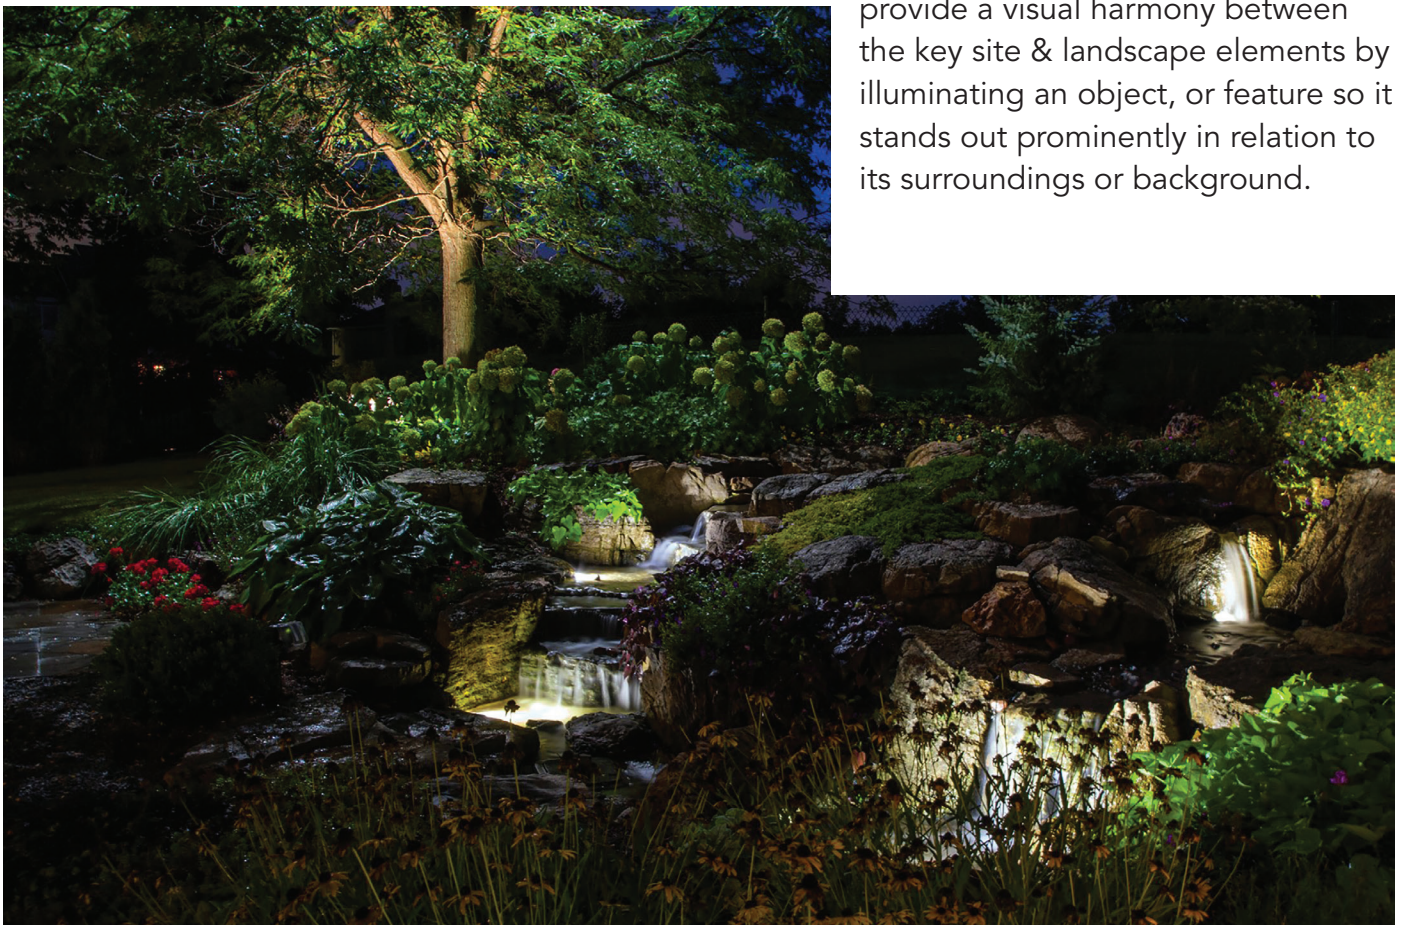

4

FEATURE LIGHTING

Directional fixtures are positioned to provide a visual harmony between the key site & landscape elements by illuminating an object, or feature so it stands out prominently in relation to its surroundings or background.

5 STEP LIGHTING

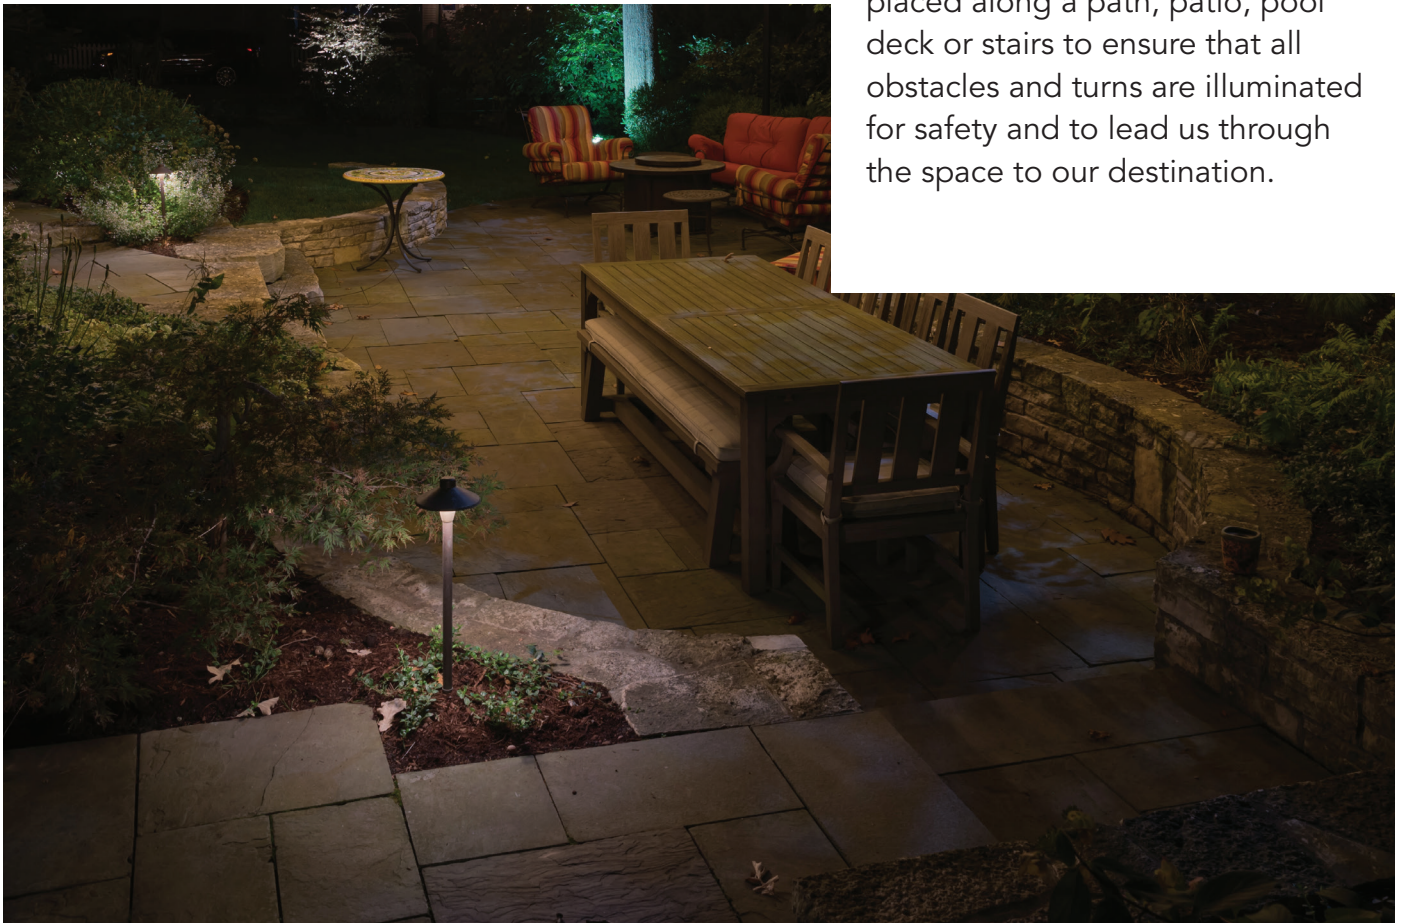

Specialized fixtures are installed into structures to safely illuminate steps, turns, and grade changes. Proper placement and installation is performed to carefully conceal the fixture's presence.

6 PATH LIGHTING

Specific fixtures are strategically placed along a path, patio, pool deck or stairs to ensure that all obstacles and turns are illuminated for safety and to lead us through the space to our destination.

7 TASK LIGHTING

Positioned above work surfaces, countertops, grills, and dining areas, these fixtures provide just enough illumination to perform necessary tasks. In many cases, separate switches are installed for task lighting areas.

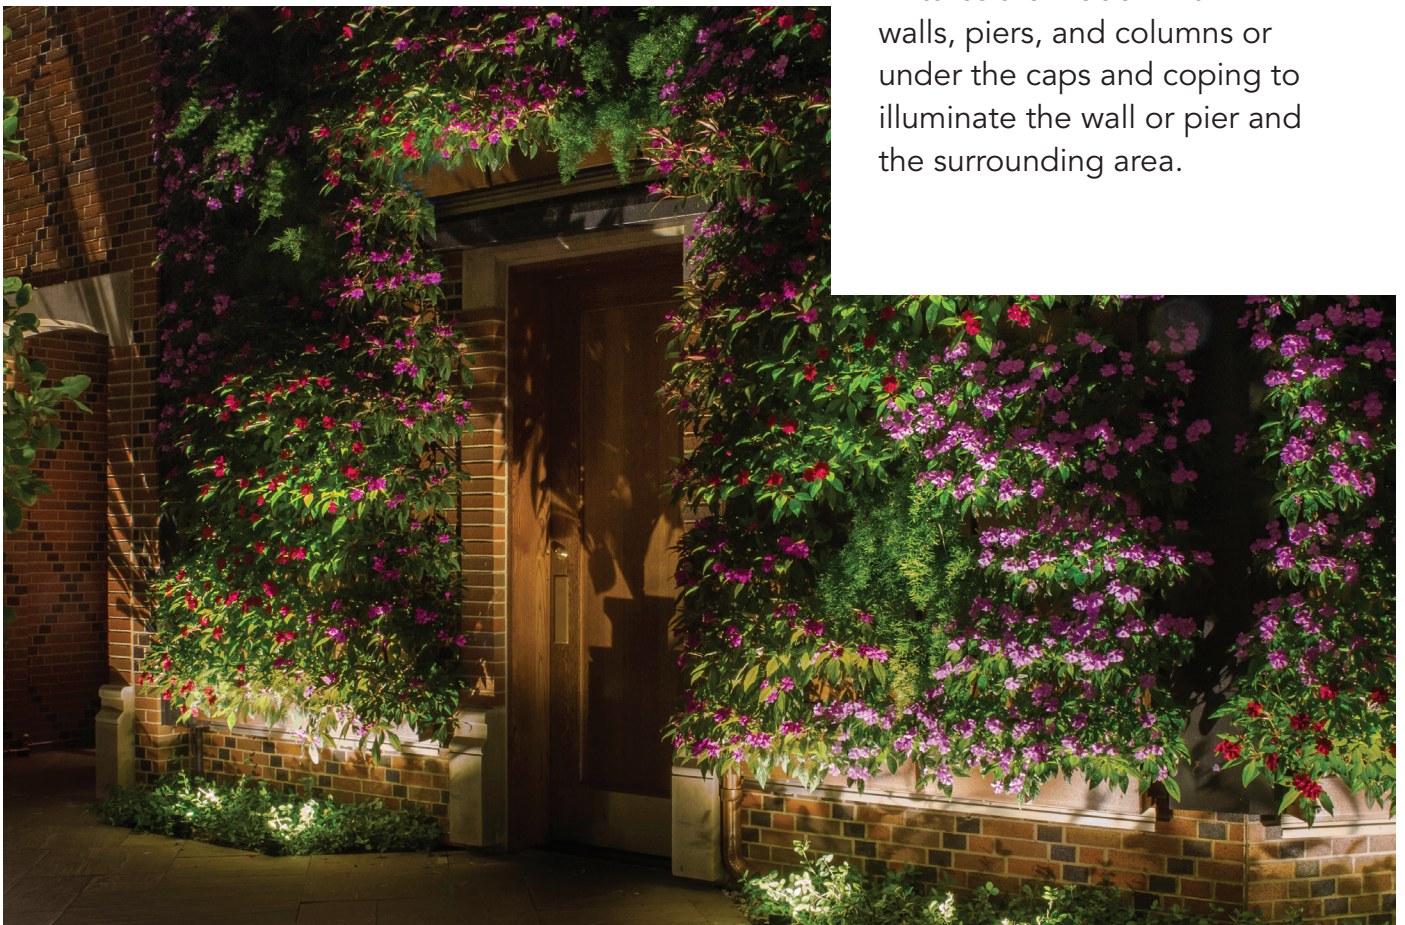

8 BISTRO LIGHTING

Installed with varying pattern options, specially designed string lights are placed within pergolas, porches, gazebos, from homes, trees, and decorative posts to provide festive dining and entertainment spaces.

9 WALL LIGHTING

Fixtures are hidden within walls, piers, and columns or under the caps and coping to illuminate the wall or pier and the surrounding area.

FIXTURE TYPES

The illumination effects and applications that are expressed in this booklet are created with a variety of fixture types. Below is the list of fixtures that may be utilized by Night Light, Inc. The customized illumination system provided by your senior lighting designer may implement the following fixture options.

SQUARES - 12V/120V

APPLICATIONS: Moon Light, Tree Accent, Feature, Sculpture, Artwork, Fountain, & Façade.

SPECS: 4W, 7W, 12W, 20W, 40W Integrated LED's 120 Degree Beam Spread Available in - Warm (3000K), Natural (4000K), Cool (5000K)

BULLET - 12V/120V

APPLICATIONS: Moon Light, Tree Accent, Task, Sculpture, Artwork, Fountain, & Façade.

SPECS: 3W, 5W, 7W, 15W, 18W LED Lamps 40 Degree Beam Spread Available in - Warm (3000K), Natural (4000K), Cool (5000K)

PATH LIGHT - 12V

APPLICATIONS: Steps, Paths, Driveways & Planting Beds.

SPECS: 4W COB LED Lamps Surround Spread Available in - Warm (3000K)

WALL AND STEP LIGHT -12V

APPLICATIONS: Walls, Seat Walls, Steps, Decks, Docks, Outdoor Kitchens.

SPECS: 3W, 5W, 7W, 15W, 18W LED Lamps 40 Degree Beam Spread Available in - Warm (3000K), Natural (4000K), Cool (5000K)

BISTRO - 12V/120V

APPLICATIONS: Patios, Pergolas, Steps, Porches, Decks, & Entertainment Spaces.

SPECS: 1W LED medium base (non-dimmable) & 2volt 1W LED medium base (dimmable with proper device) Available in - Warm White

TASK LIGHT

APPLICATIONS: Grills, Countertops, Bars, Entertainment Spaces.

SPECS: 3W, 5W LED Lamps. 40 Degree Beam Spread. Available in - Warm (3000K), Natural (4000K), Cool (5000K)

At Night Light everything we do we believe in challenging the status quo. We believe in thinking differently. The way that we challenge the status quo is by providing products and services that are the most efficient, well designed, simple, longest lasting and tailored to the specific needs, budgets and values of our clients. We just happen to provide design-build landscape illumination for those who appreciate the difference.
